LONDON,

Printed by R. & W. Leybourn  
for the Company of Stationers.

### Profitable Observations and Notes.

ALL measures of length are deduced from barley corns; as 3 barley corns make an inch, 12 inches 1 foot, 3 foot 1 yard, 5 yards & a half one statute pole or perch, 40 perches make a furlong, 8 furlongs make one English mile; in a mile are 320 perches or poles, 1056 paces: els 1408, yards 1760, feet 5280, inches 63360, and barley corns 190080.

The circumference of the earth and sea jointly is 25036 miles, & the Diameter 7966 miles, and its semidiameter 3983 miles, according to English mensuration.

*The dimensions of Engl. & the adjacent Islands.*

THE length of England from south to north is 386 miles, the broadest place from the *Landsend* to *Sandwich* is 279 miles, the next broadest place which is between *Davids* and *Yarmouth* in the east is 240 miles. The whole compass of England is 1532 miles.

The length of Ireland north and south is 303 miles, the greatest breadth thereof east and west is 113 miles: the whole compass of the main Land is 948 miles.

The greatest length of Scotland south & north is 480 miles, & the breadth east and west is 165 miles, the whole compass 1100 miles.

The Isle of *Man*, is in length 28 mil. in breadth 18 miles, and in compass 91 miles.

The Isle of *Anglesey* is in length 21 miles, in breadth 15 miles, in compass 85 miles.

The Isle of *Wight* is in length 22 miles, in breadth 11 miles, in compass 57 miles.

The Isle of *Garnsey* is in length 13 miles, in breadth 9 miles, the whole Circumference is 36 miles.

The Isle of *Jersey* is in length 10 miles, in breadth 6 miles, the Circumference 28 miles.

A Geographical description of the World containing Europe, Asia, Africa, and America.

**E**urope contains in it these Provinces, Germany, Sweden, Denmark, Italy, Muscovia, Hungary, France, Polonia, Sclavonia, Norway, Grecia, the most eminent Islands are these, England, Ireland, Sardinia, Candia, Scotland, Sicilia, Negropont, and Corsica.

The greatest length of this part of the World is 3000 miles, the breadth 900.

Asia the biggest of the four, and first known part of the World contains these principal Regions and Islands, viz. Armenia, Anatolia, Persia, Assyria, China, Syria, Arabia, Mesopotamia, India, Parthia, Medea, Palestine, Chaldea, Tartaria.

In Africa are these Provinces, viz. Egypt, Barbary, Ethiopia, Nubia, Abasines, Alonomotopi, Lybia. The Islands, Magdagascar, St. Thomas, Insula de Cape Verde, Insula de Rannaria, Insula de Madera.

America the fourth part of the World, and of the latest discovery consisteth of these two parts, Mexicana, and Peruana.

The Provinces of Mexicana, are Nova Hispania, Terra florida, Nova Albion, California, Norimbea, Nova Francia, Estotilana, the chiefe Islands of Mexicana are Greenland, Iseland, and Frisland.

The Provinces of Peruana are Brasil, Tisnada, Caribana, Peru, Cartagena, Chila, Charas Chica, Patagoras.

The chier Islands of Peruana are Hispaniola, Cuba, Jamaica, and many others.

This moneth let, cut, and lay Quick-sets and Roses as all other plants, set and plant Vines, Hops: and all fruit that growes on bushes: Sow pease, beans & onions, furnish your garden with sallads & potherbs for Summer, prune and trim all sorts of fruit trees, from Mousse, Canker, and Superfluous branches, remove grafts or young trees in the last quart, the Moon being in Aries, Libra or Scorpio.

If necessary urge, you may let blood but be sparing in Physick and be sure when a warme day comes, to prevent taking of cold through carelesnes, for the warme air in this month is not lasting, but oft deludes us to our prejudices.

6) House of L. voted useless 1648

7) Kingly office not christia 1648

9) K. C. interred at Windf. 1648

Oct. 13: 18: 20: 21:

Harrison was hanged &  
put to death at Phoenix  
his Corvols being burnt  
in the place.

Mr. Harrow suffered upon  
the 15: Day in the 1st  
place, in the same manner  
Mr. Booth & Proctor  
upon the 16: Day suffered  
in the same place being  
quarantined: /

Observations on October,

New moon the 24 day, 10 m. after 1 in morn.

First quart. the 31 day, a quart. past 2 morning.

1	6	40	5	20	Sow Wheat and Ric, remove
2	6	42	5	18	young plants & trees about the
3	6	44	5	16	new moon, observing this as a
4	6	46	5	14	seasonable secret, that in setting
5	6	48	5	12	you carefully place that side to
6	6	50	5	10	the South and West, which were
7	6	52	5	8	so before you took up the Plant,
8	6	54	5	6	otherwise the cold kills it: ga-
9	6	57	5	2	ther your remaining Winter
10	6	59	5	1	fruit, set all kinds of Nuts & A-
11	7	1	4	59	corns, and cut Rose-trees but
12	7	3	4	57	once in two years, if you intend
13	7	5	4	55	to have store of Roses.

14	7	7	4	53	The garments you last moneth
15	7	9	4	51	hung on your backs in jest, now
16	7	11	4	49	but on them close in good earnest,
17	7	13	4	47	cloath you now for prevention,
18	7	15	4	45	for the cold comes insensibly, and
19	7	17	4	43	fogs oft times beget a whole win-
20	7	20	4	40	ters cold. Consult with your Tai-
21	7	22	4	38	lors as well as Physicians.

22	7	24	4	36	5) K. Charles return frō Sp. 1623
23	7	26	4	34	6) Winchester delivered, 1645
24	7	28	4	32	15) E. of Derby be. at Bolton 1651
25	7	30	4	30	22) Essex Funerall, 1646

The four Quarters of the year described.

The Spring begins *March 9*, 3 quart. past 6 at night, at which time the Sun entereth the *Aequinoctial* signe *Aries*; causing an equality of day and night, all the habitable World over.

Summer takes beginning this year 1660, *June 10*, 3 quart. after 9 at night, the Sun then entering the Tropical signe *Cancer*, makes longest dayes, & shortest nights, on this side the *Aequator*.

Autumn, or Harvest quarter begins, the Sun entering the first scruple of *Libra*, which haps this year *Sept. 12*, 56 min. past high noon, balancing againe day and night all the World over, except the polar-Circle.

Winter begins *December 10*, neer half an hour after midnight, the Sun then entering the Tropical signe *W*, making then the shortest day, & longest night in the year, to all North of the *Aequator*.

Of Eclipses this year 1660.

To the Inhabitants of some parts of the earth will appear 3 Eclipses, 2 of the Moon, total, and 1 small one of the Sun, but none to be seen of us, yet for your satisfaction, and information of Travellers, I will you know where they are.

The first Eclipse is of the Moon the 15 *April* neer 9 in the morning being *Palm-sunday*, so great that the whole body will be darkned: this will be seen in *Virginia*, and the *Islands* in *Mare del Zur*, 4 hours eclipsed.

The 2 is a small Eclipse of the Sun *April 29*, at 6 in the morning: This will be seen in *Magellanic*, and the Regions towards the *Antarctick*-pole.

The 3 Eclipse is of the Moon the 8 of *October* at noon, the Moon being then in a Meridian just under us, and will be visible to our Antipodes: The *Arabick Ocean* will see her rise eclipsed; and *Nova Hispaniola*, she will see eclipsed, and will be wholly dark 1 hour and 3 quarters: and continue eclipsed almost 4 hours.

RIDER, 1660.

*The use of this Table, with a Caution.*

Do but observe in the fifth Column of the Almanack the hours and minutes of full-Sea at London bridge over against each several day of the Month to or from which time there noted, add or subtract such hours and minutes as this Table appoint, and the total of the one, or the other shall be the time of the full-Sea at the places above said, saved the Addition of time, which by the variation of the Moons latitude may be caused, or sometimes more or less, by their site and quantity; a thing to be considered when they pass by any haven, or such like.
